

JOHNS HOPKINS

WHITING SCHOOL of ENGINEERING

April 19, 2023

Linh Le
6411 Julie St
San Diego, CA 92115-1528
United States

Dear Linh:

Congratulations! It is my pleasure to grant you provisional status to the Johns Hopkins University Whiting School of Engineering, Engineering for Professionals program as a Master of Science student in Computer Science. This status provides you the opportunity to enroll in prerequisite courses to earn full admission at Johns Hopkins.

As a student in the Engineering for Professionals program, you will learn from faculty who are true pioneers in their field, including experts from the Johns Hopkins Applied Physics Lab, the Homewood main campus, and industry. Whether your goal is to advance to a senior-level position or start fresh as an entrepreneur, our modern coursework will prepare you for your next steps.

To accept the offer of admission, please login to your [student status page](#) and record a response no later than one year from the date of this letter. After this time, to be reconsidered, you must email ep-admissions@jhu.edu to reapply. Please contact Ian Nolan, inolan1@jhu.edu with any questions or for administrative assistance.

Admitted applicants who initially submitted unofficial transcripts must have their official transcripts submitted prior to registering for their first course. Transcripts are only deemed official if they are received directly from the degree granting institution or third party provider to ep-transcripts@jhu.edu. Please see [this webpage](#) for more details.

About Provisional Status

In order to gain full admission as a master's degree candidate and enroll in EP graduate courses, you must successfully complete the following prerequisite courses. This is typically accomplished within three semesters (one year) of receiving your provisional status.

- EN.605.204 Computer Organization

These courses can be taken through JHU (course numbers posted above) at a discounted tuition rate or at any regionally accredited college or university approved by your program of study. Each course must be taken for credit and a letter grade of B- or above must be received. **A grade below B- will result in the loss of provisional status, and you will need to submit an appeal statement to be reconsidered.** EP students are expected to make satisfactory academic progress to maintain their student status. The EP satisfactory academic progress policy can be found at <https://ep.jhu.edu/student-services/academic-services/academic-regulations>. If any Calculus course is specified in the list above, it must be taken and successfully completed before enrollment

in any other course. Prerequisite courses do not apply toward the requirements of the master's degree.

If you are completing your prerequisites outside of JHU you must complete the 'EP Prerequisite Checklist Form' no later than one year from the date of this letter. You will be emailed a notification to complete the form once you submit your offer response on the [student status page](#). After you have completed all prerequisite course requirements outside of JHU, notify the [program coordinator](#) assigned to your program of interest and send the official transcript(s) to ep-transcripts@jhu.edu. It is the responsibility of the student to ensure that their enrollment status is updated to full admission before taking any JHU graduate courses.

After you have accepted our offer of admission, you will receive a welcome letter, an advisor assignment, and instructions on how to proceed with the enrollment process.

Again, congratulations, and welcome to the Hopkins family.

Sincerely,

A handwritten signature in black ink, appearing to be 'Sri Sarma', with a long horizontal flourish extending to the right.

Sri Sarma
